Respected Madam,

Thank you for having organized such a wonderful visit to Shrimati Indira Gandhi College. I really appreciate your hospitality and the time you allocated to discuss the way forward. It was an extremely productive session and I am writing this letter to encapsulate the key details of the conversation and attach the Student Evaluation form for conducting the student selection exercise.

1. We discussed that we will try to achieve optimum performance for this year in terms of placement by identifying 300 candidates in their final years from across all the departments for a communication boot camp that will empower them to get placed.

2. The boot camp will be conducted for a period of 5 weeks from the 5th of January, 2022 to the 14th of February, 2022. The boot camp will be held from 1:15-4:00 PM. From 1:15-2:15 PM, we will be having career-focused information sessions. From 2:15-4:00 PM, we will be conducting soft skills training workshops according to the following schedule

- > **Week 1 - Effective Communication in a Professional Setting - Communication 101**
- > **Week 2 - Team building, Creativity and Innovation through a Project-Based Learning Model**
- > **Week 3 - Developing your Personal Brand with a focus on developing a Growth Mindset**
- > **Week 4 - Business Storytelling & Business Etiquettes**
- > **Week 5 - Interview Centric Training and Resume Writing**

3. In order to select students from the final years, we decided on a uniform evaluation process. Each mentor is assigned 20 students and from amongst them, 3 students have to be selected based on a student evaluation form attached along with this email. The form will be filled by the academic mentor. Section IV alone has to be counter verified and graded out of 5 points by members of the placement team who will be observing the interview process. We have attached two sets of question papers for the test mentioned in section III along with this email. The staff has to administer this test to their group of 20 students and evaluate the answers as per the answer key attached to this email. After getting the score out of 40, they are expected to convert it to out of 15 and enter that score in Section III of the evaluation sheet.

4. At the end of each week in the boot camp, we will be asking our students to present their learnings through an in-class activity. We will also invite founders and HR executives from different companies to come in and take part in the workshop so as to create more opportunities for placement.

5. For each student who has been selected as part of the Corps d'élite, together, we will be profiling in detail their career interests and options so as to maximize their chances of placement, in line with their individual strengths. We will also be administering a survey to these students to better profile their interests.

Please feel free to add any further points that I may have missed out in this email. Also do go through the Student Evaluation sheet and the 2 sets of Screening Tests attached here to see if it is acceptable and let me know if we can go ahead.

Dear Sir,

In continuation of my previous mail, it would be convenient if you could send us a schedule of the dates on which classes will be held during March and April as many students are concerned regarding how all the 64 hours would be accommodated within the short span of time. Some of them who wish to join are yet to make a decision due to this reason. As the semester is coming to a close, and students may leave the college in a few months, they would like to know in advance about how long they will be attending the sessions as only one or two sessions are held per week. It will be helpful if you could kindly clarify this matter so that we could help the students to reap the benefits of the training program.

Thank you.

N.VIJAYALAKSHMI.

Dear Sir,

Greetings of the day.

In response to your mail, it is hereby brought to your notice that totally 91 students have enrolled in the technical stream and 110 students have enrolled in the non-technical stream bringing the total head count to 201 as previously discussed and agreed in the previous discussions along with you. The sessions shall be conveniently conducted from 3.30 onwards. There are 37 participants from PG and 72 participants from UG in the management group. It is assumed that all students will be attending the sessions further on and staff shall monitor their participation during the sessions.

Thanking you.

Respected CEO and Principal,

I am writing this email with the intent of scheduling a meeting to streamline the rollout of the **Placement Crash Course for the final year students**.

The sessions commenced last week and two classes have been conducted ever since. The classes are held on **Wednesdays and Fridays from 3:30 to 5:30 pm**. This timing was chosen after discussing it with the teaching staff of the college.

We had already indicated to the coordinating staff members -- Madam Vijayalakshmi and Madam Malathy -- that in order to scale down the price of the **crash course offering to Rs 500**, we require the participation of **at least 200 students in** the program on the whole - both **technology and arts** put together. Ideally, we would like to see 100 percent participation in this course from all final year students as it will strongly benefit their placement opportunities by empowering their candidacy with the requisite technical skill, managerial acumen, and corporate exposure.

There was a request to reschedule class timings on both Wednesday and Friday to suit student needs. This was communicated to us only an hour or so before the classes commenced. In spite of adjusting the timings to cater to the student requirements, we witnessed sub-optimal participation from the students with only 80 students attending the technical session and a mere 18-20 at best attending the non-technical sessions. Due to the absence of staff monitoring, it was also extremely difficult for us to keep track of the students - more so in the HR session wherein, there was extreme confusion. The WhatsApp group with the students was not created with the right set of students causing them to be removed from time to time, distorting communications.

I would like to initiate a meeting **at the earliest, before proceeding further** to set certain things in order so as to maximize the benefit for the students and minimize any irregularities or aberrations to facilitate smooth conduct of the sessions hereafter. Request the presence of the CEO, the Principal, the Vice-Principal, and other key staff members to reconcile the following issues

- Finalizing the timing of the sessions
- Ensuring consistent and expected level of student participation
- Vouchsafing staff monitoring to facilitate smooth conduct of these sessions

Seeking your understanding.

Respected Sir,

We at InLustro Learning Pvt. Ltd. are writing this email to you with reference to our earlier meeting last week regarding the results of our crash course program.

Attached with this email are 3 documents :

1. An answer booklet containing the detailed explanations and solutions for all the tests administered to the students during our course.
2. A PDF document titled "All Results" containing the marks of each test, the subject-wise average, and individual performance feedback along with identified areas of improvement for each candidate.
3. A PDF document titled "Top 30 Students" containing the performance records of the top 30 students who have been shortlisted for finer training and potential placement assistance.

Looking forward to having a more detailed discussion about the results and the way forward for the shortlisted candidates later this week on Thursday.

Respected CEO,

Thank you for the response.

I completely understand. Classes are going on smoothly now.

It's only natural that there are such issues in the beginning. We are confident that with the support of the management and the staff, such issues can be quickly remedied.

I am glad to share that the students are doing well. Thank you for giving us the opportunity.

TRAINING EVALUATION REPORT

Executive Summary

The main purpose of this evaluation report is to assess the effectiveness of the sessions carried out for students of Srimati Indira Gandhi college. This report provides an insight about programme objectives, activities facilitated, assessment methods and overview of the evaluation objectives. Overall, the students and the mentors informed that the programme was well received and rated the experience as good.

While examining the evaluation process, learner engagement, response, transferring of knowledge needed some improvements to achieve objectives in a better way. It is referring to the designing of programme plan, methods of delivery, different kinds of assessment etc., Therefore, recommendations for further actions are as follows:

- To modify the current training material to ensure that clear and specific objectives are met.
- Create a yearly planner with realistic manageable goals by identifying the audience needs.
- Activities and resources have to be reframed or refined based on the learners' current KSA.
- Follow-up support is essential throughout the training process.

Learning outcomes achieved

- Able to frame simple day-day conversations
- Learners understand different elements of an email.
- Able to understand the importance of subject and to differentiate between formal and informal way of email communication.
- Able to write simple emails.
- Able to deliver short speeches.
- Able to design slides with effective visuals with simple content.
- Able to answer commonly asked interview questions and know how to respond in a right way.

Learner Engagement

- Rewards in the form of certificates enhanced learner engagement
- This created a learning spirit & they were motivated and inspired to participate in discussions.
- The active participation of many learners in speech and presentations influenced other learners to come forward in giving their speech.
- Used real-life scenarios to engage them in the learning process.
- Learner engagement soared up at the time presenting a speech.

Observation

- Chosen simple content to facilitate the learning process easier.
- Applied VAK learning styles to streamline the learning process.
- Applied active learning methods that supported the learners to conceptualize the materials to understand and to re-call it.
- Data evaluation is gathered through presentations, JAM topics, day-day interactions, class tests and by mock interviews.

Gap Identification

- Learners need in-depth knowledge in rudimentary level of English.
- Majority of learners finds it hard to communicate in the English language.
- Time spent on each topic could be extended.
- It would be ideal to have a batch size of 30-35 participants.

Challenges

- Poor bandwidth issues
- Batch size
- Communication gap
- Time duration

Biggest Impact

- **Mercy Enrose** – I remember this learner due to her extensive participation and her way of applying the learning would be quicker. While delivering the speech, she was one of the learners who followed all the tips and strategies of structuring a presentation. She has shown utmost participation with correct answers.
- **Lakshmipriya** - A learner who takes part in almost all the activities and who brings the entire group to participate due to her influence. She is a learner who applied whatever that has been given in the participant handout and quickly apply whatever she has learnt like Mercy.
- **Samyuktha** – Any classroom discussion gets motivated due to her presence. She is an active participant who comes forward very quickly in presenting it in a right way. She supports and helps her peers in delivering their speech and spread positive vibes in the class. It becomes interesting and encouraging with her presence that evokes critical thoughts in everyone. She becomes an observer to the class and shares effective feedback about the students sometimes.
- **Mahesh Pasumai** – This learner is highly curious to learn and shares her answers for almost all discussions. I remember her because though she has

challenges in communicating in English, but confidently she comes forward in presenting her views without any hesitation.

- **Srinithi Ravichandran** – I remember her for good work in presentation skills in designing slides, She was able to apply all the techniques that's has been discussed during the class hours. She is an enthusiastic learner who is interactive and studious in engaging conversations.

Tangible outcome

Performance Analysis:

- **Learner engagement:** The learners found the content & materials to be engaging, useful and favourable that stimulated learning process and it was actually matching their needs to find relevant jobs.
- **Learning outcomes:** This was clearly identified with direct and indirect ways of assessing them through oral-discussions, in small group activities, a questionnaire to assess their obtained knowledge, skills and attitudes.
- **Behaviour:** Assessing behavioural changes would be challenging as acquiring knowledge can be measured quickly however these changes have to applied in the workplace lies the biggest challenge.

Follow-up

To further enhance this programme, the following modules can be implemented to improve students' skill development and the continuous process of learning help them to face the interviews in an effective manner and to raise the bar as per the employers' requirements. Therefore, in view of the above, we are providing a long-term soft skills course with our R.E.A.L programme as discussed with you over the conversation for the UG and PG students.

ACE THE PYTHON INTERVIEW

SYLLABUS

OBJECTIVES OF THE COURSE

- Understand and use various data structures in Python, such as lists, tuples, dictionaries, stacks, queues, linked lists, hash tables, and sets.
- Understand and use recursion and divide and conquer techniques to solve problems in Python.
- Understand and implement object-oriented analysis and design principles and advanced Python concepts such as decorators, generators, metaclasses, and context managers.
- Understand and design scalable and maintainable systems, and prepare for technical interviews through tips, strategies, mock interviews, and feedback sessions.

Unit 1: Data Structures

- Introduction to data structures and their importance in programming
- Lists, tuples, and dictionaries in Python
- Stacks, queues, and linked lists
- Hash tables and sets

Unit 2: Recursion and Divide and Conquer

- Understanding recursion and divide and conquer and their uses in problem-solving
- Recursive and divide and conquer algorithms and problem-solving
- Examples of problems that can be solved using recursion and divide and conquer and their solutions in Python

Unit 3: Object-Oriented Analysis and Design and Advanced Python

- Understanding OOP and its uses in software development
- Classes and objects
- Inheritance and polymorphism
- Design patterns and best practices
- Advanced Python topics such as decorators, generators, metaclasses, and context managers
- Concurrency through threads in Python

Unit 4: System Design

- System design principles and best practices
- Designing scalable and maintainable systems
- Understanding trade-offs and constraints when designing systems
- Examples of system design problems and their solutions in Python

Unit 5: Interview Preparation

- Tips and strategies for acing technical interviews
- Commonly asked interview questions and how to solve them
- Whiteboarding exercises and how to approach them
- Mock interviews and feedback sessions
- Resume and portfolio building advice

COURSE LEARNING OUTCOMES

- Upon completion of the course, students will be able to implement various data structures in Python to solve problems efficiently.
- Students will be able to analyze problems and determine if they can be solved using recursion and/or divide and conquer techniques and implement the solution in Python.
- Students will be able to design object-oriented software and understand advanced Python concepts, and be able to use concurrency through threads in Python.
- Students will be able to design scalable and maintainable systems and be prepared for technical interviews through the understanding of system design principles and best practices, and the ability to solve common interview problems.

ADVANCED JAVA

SYLLABUS

OBJECTIVES OF THE COURSE

- Understand and use basic and advanced features of the Java programming language, including control structures, data types, object-oriented concepts, interfaces, generics, and functional programming.
- Understand and implement concurrency in Java through the use of threads, the Executor framework, and thread-safe programming techniques.
- Understand and apply design patterns in Java to solve common programming problems and improve the design of the software.
- Understand and apply object-oriented analysis and design principles and best practices for designing large-scale systems in Java, including class design, UML diagrams, and garbage collection and memory management.

Unit 1: Basic Java

- Introduction to Java and its basic syntax
- Primitive data types and control structures
- Arrays and ArrayLists
- Methods and parameters
- Basic object-oriented concepts

Unit 2: Advanced Java

- Interfaces and abstract classes
- Inheritance and polymorphism
- Exception handling
- Generics
- Enumerations and annotations
- Streams and functional programming

Unit 3: Concurrency

- Introduction to concurrency in Java
- Threads and Runnable interface
- Synchronization and locks
- Executor framework
- Concurrent data structures
- Thread-safe programming

Unit 4: Design Patterns

- Introduction to design patterns
- Creational patterns (e.g. Singleton, Factory, Builder)
- Structural patterns (e.g. Adapter, Decorator, Facade)
- Behavioral patterns (e.g. Observer, Template Method, State)
- Examples of how to use design patterns in Java

Unit 5: Object-Oriented Analysis and System Design

- Object-oriented analysis and design principles
- UML diagrams and class design
- Design patterns for system design
- Garbage collection and memory management
- Best practices for designing large-scale systems in Java

COURSE LEARNING OUTCOMES

- Upon completion of the course, students will be able to write Java programs using various control structures, data types, and object-oriented concepts, including interfaces, generics, and functional programming.
- Students will be able to design and implement concurrent Java programs using threads, the Executor framework, and thread-safe programming techniques.
- Students will be able to recognize and apply common design patterns in Java to improve the design and maintainability of their code.
- Students will be able to design and implement large-scale systems in Java using object-oriented analysis and design principles, class design, UML diagrams, and best practices for garbage collection and memory management.

CORE JAVA

SYLLABUS

OBJECTIVES OF THE COURSE

- Students will understand the basic syntax of the Java programming language.
- Students will understand the principles of object-oriented programming and how they are applied in Java.
- Students will understand the concepts of Exception Handling and Threads
- Students will gain experience with basic Input/Output operations and GUI programming

Unit 1: Introduction to Java Programming

- Subunit 1.1: Introduction to the Java Programming Language
- Subunit 1.2: Setting up the development environment (Eclipse IDE)
- Subunit 1.3: Basic syntax (comments, data types, variables, operators, control flow)

Unit 2: Object-Oriented Programming

- Subunit 2.1: Classes, objects, and methods
- Subunit 2.2: Encapsulation, inheritance, and polymorphism
- Subunit 2.3: Abstract classes and interfaces
- Subunit 2.4: Interfaces and polymorphism

Unit 3: Exception Handling and Collections

- Subunit 3.1: Try-catch-finally
- Subunit 3.2: Built-in exceptions and custom exceptions
- Subunit 3.3: Arrays, ArrayList, HashMap, and other collections
- Subunit 3.4: Sets, Maps, Queues, and comparison
- Subunit 3.5: Generics and type-safe collections

Unit 4: Input and Output

- Subunit 4.1: Reading and writing to the console
- Subunit 4.2: Reading and writing to files
- Subunit 4.3: Input/Output Streams
- Subunit 4.4: File I/O
- Subunit 4.5: Serialization and Deserialization

Unit 5: Threads and Concurrency

- Subunit 5.1: Introduction to Threads and Concurrency
- Subunit 5.2: Threads, Runnable and Executor Framework
- Subunit 5.3: Synchronization

Learning Outcome

- Students will be able to write and run Java programs using the Eclipse IDE, including basic constructs such as variables, data types, operators, control flow, and loops.
- Students will be able to create Java programs using classes, objects, inheritance, polymorphism, and encapsulation, and explain the concepts of encapsulation, inheritance, and polymorphism.
- Students will be able to design, use and implement Exception Handling in their code and able to understand the concepts of thread and write concurrent programs
- Students will be able to read and write data to files and console and create simple graphical user interfaces using AWT and Swing, as well as an introduction to JavaFX

Teacher: Pavani Scinde

PYTHON PROGRAMMING

SYLLABUS

OBJECTIVES OF THE COURSE

- To introduce the student to basic concepts of Python, Pandas & Data Visualization.
- To enable the students to write simple Python programs.
- To have a strong foundation for various applications of Python like Data Science, Machine Learning, and Artificial Intelligence.
- To induce strong programming concepts and enable the students to face technical interviews.

UNIT 1: INTRODUCTION, STRINGS, NUMBERS & MATH

- Introduction, Setting up Python, Your first Python Program
- String & String Methods
- Numbers and Math : Order of Operations, Built-in functions for working with numbers

UNIT 2: FUNCTIONS & LOOPS, DEBUGGING, CONDITIONALS

- Functions and Loops
- Finding & Fixing Code bugs
- Conditional Logic & Control Flow
- Testing a function

UNIT 3: TUPLES, LISTS, DICTIONARIES, OOP, MODULES

- Tuples, Lists & Dictionaries
- Object Oriented Programming
- Modules and Packages, Installing Packages with pip
- Testing a class

UNIT 4: FILE I/O, PACKAGES, DATABASES

- File Input and Output
- Installing Packages with pip
- Working with Databases

UNIT 5: WEB INTERACTION, SCIENTIFIC COMPUTING, GUI

- Interacting with the Web
- Scientific Computing

-
- Graphical User Interfaces

COURSE LEARNING OUTCOMES

- The students will be able to develop a strong competency in the language.
- The students will be capable of analyzing the given data and applying Python Programming to provide meaningful results.
- The students can apply the skills of Python in the fields of Data Science, Machine Learning, and Artificial Intelligence.
- The students will be able to Crack the programming interview in any Product/Service based firm.

CERTIFICATE

OF COMPLETION

This Certifies that

Arifa.A

II B.Sc(IT) at Indira Gandhi College, has successfully completed the **Data Structures and Algorithms** course
(July 2021 to December 2021)

A handwritten signature in black ink, appearing to read 'Aditya Sambamoorthy'.

DATA STRUCTURES AND ALGORITHMS

SYLLABUS

OBJECTIVES OF THE COURSE

- To introduce the students basic concepts of Data Structures and Problem Solving.
- Develop algorithms for manipulating stacks, queues, linked lists, hash tables, trees, and graphs.
- Develop the data structures for implementing the above algorithms.
- Design recursive and divide and conquer algorithms.
- Familiarize the student with the issues of Time and Space complexity and examine various algorithms from this perspective.

UNIT 1: ANALYSIS OF ALGORITHMS, RECURSION, ARRAYS & STRINGS

- Growth of functions - Asymptotic Notations Omega, Theta,
- Recursion Tree Method & Space Complexity
- Introduction to Recursion & Tail Recursion
- Insertion, Deletion, Updation, Shifting elements, and other operations in an Array
- Searching and Sorting
- Problems based on Recursion, Array Manipulations, and String manipulations

UNIT 2: LINKED LISTS, STACKS, AND QUEUES

- Implementation of Linked Lists - Singly Linked List, Doubly Linked List, and Circular Linked List.
- Implementation of insertion, deletion, traversal, and reversal operations for Linked Lists.
- Problems based on Linked List.
- Implementation of Stacks and Queues using arrays and linked lists.
- Problems based on Stacks and Queues.

UNIT 3: TREES, BINARY SEARCH TREES, AND HEAPS

- Binary Tree - Implementation, Traversal, and Major Concepts
- Binary Search Tree - Implementation, Insertion, Deletion, and other operations
- AVL Trees and Red Black Trees and Applications of BST
- Heaps - Implementation and other operations
- Problems based on Trees, BST, and Heaps

UNIT 4: HASH TABLES AND GRAPHS

- Introduction to Hashing, Direct Address Table & Collision Handling, Chaining, Open Addressing & Double Hashing.
- Introduction to Graphs - Types, Representations, BFS, DFS and its applications - Detect Cycle in Undirected Graph, Detect Cycle in Directed Graph, Topological Sorting, Shortest Path Problems
- Prim's Algorithm, Dijkstra's Algorithm, Bellman Ford Algorithm, Kosaraju's Algorithm, Articulation Point, Bridges in Graph, Tarjan's Algorithm
- Coding Problems involving Hash Maps and Graphs

UNIT 5: GREEDY ALGORITHMS AND OTHER ADVANCED TOPICS

- Greedy Algorithms - Activity Selection Problem, Fractional Knapsack, Job sequencing problem, and Huffman Encoding along with other typical problems.
- Dynamic Programming - Memoization, Tabulation, LCS and its variations, Coin Change, KnapSack, LIS and its variations, Egg Drop Puzzle, Subset Sum, Matrix Chain Multiplication, Palindrome Partitioning
- Backtracking Problems
- Trie, Segment Tree and Disjoint Sets
- Problems based on Greedy Algorithms, Dynamic Programming, Backtracking Problems, and other advanced concepts covered in this unit.

COURSE LEARNING OUTCOMES

- On successful completion of the course, the students will be able to
- Apply various data structures such as stack, queue, hash table, priority queue, binary search tree, graph, and string to solve programming challenges.
- Apply basic algorithmic techniques such as greedy algorithms, binary search, sorting, and dynamic programming to solve programming challenges.
- Apply graph and string algorithms to solve real-world challenges: finding the shortest paths on huge maps and assembling genomes from millions of pieces.
- Solve complex programming challenges using advanced techniques: maximum flow, linear programming, approximate algorithms, SAT-solvers, and streaming.
