(57) Abstract :	
7. ABSTRACT OF THE INVENTION The present invention relates to an agricultural Eco friendly Organic Plant Bactericidal composition for treating, preventing, inhibiting, eliminating or delaying the onset of a plant bacterial infection or infestation in a plant, produced from mud pot fermentation of Datura metal leaves with cow urine at specified proportions, methodology and conditions. The composition contains, bioactive metabolites produced as end product by above said mud pot fermentation. The Eco friendly Organic Plant Bactericidal compositions of the present invention provide previously unseen eco-friendly antimicrobial effectiveness against plant pathogenic bacteria. These compositions comprise: a) a pH ranges about 8 to 8.5 b) The composition contains high bioactive metabolites produced by above said fermentation c) said concentration is stable for longer period of time. The composition allows crop yield to be increased by preventing or inhibiting the microbial disease in plants, and permits increasing the bactericidal activity of plants against plant pathogens. Furthermore, the composition prevents the environmental contamination caused by the use of chemical pesticides and also contributes to increase in farmer income.

(57) Abstract :

Twitter Sentiment Analysis using Machine Learning on Python Abstract: Many people use Twitter as a social media platform to express their thoughts and emotions at various times throughout the day. When it comes to data analysis, sentiment analysis refers to the process of recognising and obtaining the sentiment of data. Twitter data is used to determine the user's sentiments (tweets). The amount of research in this field has grown significantly over the last few decades. Tweets have a convoluted format, making processing them far more difficult. Slang and abbreviations are among the difficulties that arise as a result of the small size of the Twitter format, which makes communication difficult. This work will be used to analyse several articles on Twitter sentiment analysis, and we will offer a more generic Python-based method to sentiment analysis research in the process.

Intellectual Property  
Patent Rights - Novelty

Ms. S.A. Suganthi, Junior Patent Analyst, Molecular Connections Private Limited, Bengaluru

**Shrimati Indira Gandhi College**  
1 October 2021

We, #Shrimati Indira Gandhi College, Trichy yet again raised the benchmark by hosting a webinar on "Alumni Spotlight Series - Novelty of Patent Rights" by Ms. S. A. Suganthi, (Alumnae batch 2015-2018) Junior Patent Analyst, Molecular Connections Private Limited, Bengaluru on 28.09.2021.

Ms. S. A. Suganthi discussed about the novelty of intellectual property law, trademarks, trade secrets and technical information about inventions. She also explained the requirements, typ... See more
